Title: From Scorekeeper to Strategist

Verse 1:

Once I stared at numbers, lost and confused,
 Reports on my screen, feeling overused.
 But now I see patterns, I see the way,
 Simple math can guide my day.

Gather numbers — that's the start,
 Analyze with a thinking heart.
 From recording the past to predicting ahead,
 Strategy begins where the figures are read.

Chorus:

From scorekeeper to strategist, we rise,
Turning data into business insight wise.
Just divide, compare, and calculate,
Let simple math decide your fate.
Financial clarity's not hard to unveil— Learning made simple with **SEKAEL**!

Verse 2:

Let's talk **profit margin** — here's what it means:
How much you keep from your sales routines.
Profit divided by sales, times a hundred,
That's your percent — the truth, unblunted.

Current ratio, check your pay,
Can short-term assets clear bills today?
Assets over liabilities — the clue,
If you've got two to one, your cash flow's true.

Debt-to-equity shows your stand,
 How much you owe versus your hand.
 Too much debt? Be wise and aware,
 Balance the load, handle with care.

Chorus:

From scorekeeper to strategist, we rise,
 Turning data into business insight wise.
 Just divide, compare, and calculate,
 Let simple math decide your fate.
 Financial clarity's not hard to unveil—
 Learning made simple with **SEKAEL**!

Verse 3:

Trend analysis — connect the dots,
 See if growth or decline is what you've got.
 Regression sounds tough but it's not that bad,
 "If I spend more here, will more sales be had?"

Across nations, math takes form,
 In Japan, they forecast and perform.
 The U.S. checks ROI and DCF,
 Investors want growth — that's their test.
 In the **Philippines**, with labor and VAT,
 They calculate costs and bonuses at that.

Bridge:

Pat's nails shine bright with margin gains,
 Cris's café brews ROI in her veins.
 Zyrine's team learns the full cost to pay,
 Simple math guides the business way.

Chorus

From scorekeeper to strategist, we rise,
Turning numbers into futures that are wise.
Profit, ROI, and cash flow's tale—
Learning made smarter with **SEKAEL**!
With every sum, division, and trail,
We build tomorrow — with math that prevails.
